English, Hindi, Kannada, Tulu.

PROJECT EXPERIENCE

Project 1: Blog Site:

Technology: Node JS, EXPRESS JS, Mongo DB, EJS.

Description:

- Implemented features to add, read, and delete blog posts directly on the website.
- Leveraged MongoDB to store and retrieve blog data efficiently.
- Utilized Express.js to handle routing and manage server-side logic & Used EJS template engine to render dynamic content and display blog posts.

Project 2: Task Management System:

Technology: Node JS, EXPRESS JS, Mongo DB, Express handlebars.

Description:

- Created a task management system with CRUD (Create, Read, Update, Delete) operations.
- Implemented functionalities to create new tasks, update existing tasks, and delete tasks.
- Leveraged MongoDB to store task data and utilized its query capabilities for efficient data retrieval.
- Utilized Node.js and Express.js for server-side development and routing.
- Designed intuitive user interfaces to interact with the task management system.

Project 3: Secure login in:

Technology: Node JS, EXPRESS JS, Mongo DB, EJS.

Description:

- Implemented a secure user authentication system to validate user credentials.
- Utilized npm validate package for email validation and to prevent duplicate email registrations.
- Designed an intuitive user interface with appropriate form validation for a seamless user experience.
